

Transformation Begins With a Single Cell

Coherent Spark converts any spreadsheet into enterprise-grade code, automatically, instantly, and at scale.

We work with some of the largest and most trusted brands in financial services, insurance and beyond. Our enterprise clients tell us Spark is helping save millions of dollars per year in coding costs alone. The efficiency gains are impressive, and the ROI is remarkable.

Convert

No learning curve - business analysts continue to build and enhance their strategic models using spreadsheets

Hyper-automation - Upload spreadsheet models and convert them to scalable cloud services in minutes

Optimization – Achieve 100 to 1000 x runtime performance improvements compared to the original spreadsheets

Control

Quality assurance - with data consistency analysis, large scale testbeds and enterprise-grade regression analysis

Version control - Manage releases to ensure everyone is on the same version

Audit Trails - Address the risks of end-user computing (EUC) with searchable records of every update, transaction and underlying calculation

Access Control - Protect your intellectual property with cloud access controls as well as cell-level protection for securely disseminating spreadsheets to users

Connect

Code Snippets - Spark automatically generates code for connecting your new cloud services to Apps, systems and data platforms

Integration - Programmers can choose from over 20 programming language implementations – dramatically accelerating project delivery

Data Platforms – Embed Spark services directly into data platforms and avoid unnecessary data transmission costs

Chain spreadsheet logic - to automate end-to-end processes for dramatic efficiency gains

Introducing AI-based modeling superpowers for spreadsheets

Spark establishes a true partnership between business, IT, Compliance and Risk

- Fostering innovation,
- Integrating instantly,
- Accelerating time to revenue,
- Addressing inefficiencies,
- Eliminating errors,
- Securing intellectual property,
- Aligning with regulatory requirements.

Business leaders

Continuous Innovation

Business experts continue to generate new ideas and innovations using spreadsheet models. Spark adds scenario testing and integrations.

IT / Tech

Accelerate Delivery

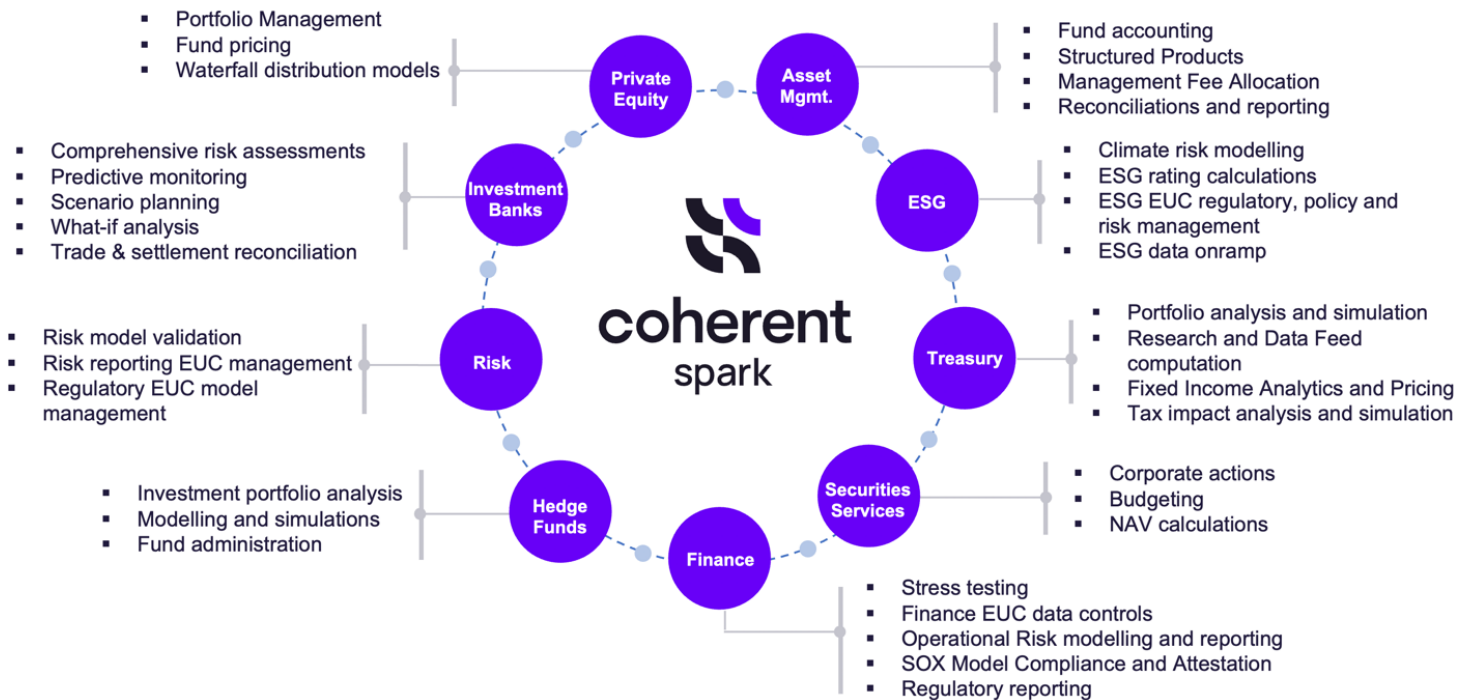

Accelerate digital transformation projects in partnership with business and implement quality assurance and governance controls.

Compliance / Risk

Control for EUC

Take control of spreadsheet use and propagation in your organization, track every transaction and underlying calculation.
